

Prathamesh Berad

Associate Product Manager

✉ berad.prathamesh210@gmail.com ☎ +91-9307631828 📄 Portfolio 🌐 LinkedIn 📍 Pune

PROFESSIONAL SUMMARY

Strategic Product Manager with hands-on experience building **AI-enabled B2B and consumer products**. Skilled in growth experimentation, funnel optimization, and LLM-assisted workflows to drive measurable improvements in conversion, retention, and revenue. Combines structured, data-driven thinking with a **strong customer-first mindset** to translate insights into scalable, revenue-impacting product decisions.

WORK EXPERIENCE

Product Manager (Part time)

01/2026 – Present

OpsellAI 📄

- Drove end-to-end sprint execution for SellerOS MVP across seven product epics, owning user stories, acceptance criteria, risk registers, and pilot demo readiness **across a 14-person cross-functional team**.
- **Defined** activation metrics and **onboarding flow** from scratch, including a seven-step seller funnel, sub-10-minute onboarding, and connector hierarchy that preserved the activation baseline.
- Translated Amazon SP-API and Flipkart OAuth constraints into product scope decisions, turning platform boundaries into clearly defined feature limits for engineering, data science, and design — with 8 contributors indirectly aligned to product direction.

Graduate Engineer Trainee (Full-time)

02/2026 – Present | Pune

Tata Technologies 📄

- **Built an AI-powered project management** ecosystem across Azure DevOps, Power Automate, Copilot Studio, and Power BI, cutting manual reporting from 3-5 hrs/week down to under 30 minutes.
- Engineered sprint intelligence pipelines that converted raw DevOps data into AI-generated summaries, risk alerts, and stakeholder reports, **improving reporting turnaround by over 80%**.
- Developed AI-driven PM capabilities including health scoring, delivery prediction, and risk detection, contributing to a projected **20% improvement in on-time delivery** and 2-4 weeks earlier risk identification.

PROJECTS

Recruit-AI 📄

AI Hiring Assistant B2B SaaS

- Built an AI-powered screening **workflow automating** first-round resume evaluation, targeting a **60–70% reduction** in recruiter screening effort.
- Designed structured scoring, summaries, and auto-categorization to enable **same-day shortlisting** and faster hiring decisions.
- Enabled automated candidate communication to reduce recruiter follow-up delays and **improve workflow efficiency**.

Profitability Calculator 📄

Live Web App for e-commerce retailers.

- Identified a **high-friction seller pain point** and shipped a production-ready profitability calculator across 7 marketplaces in a single MVP cycle, from fee research and data structuring to spec writing and live deployment.
- Owned the full product process solo: scraped platform fee data, authored a structured data model, wrote the engineering spec, and drove build execution, compressing a typical **multi-sprint discovery cycle into one focused delivery**.
- Shipped with a clear outcome metric in mind: sellers get net profit, margin, ROI, and break-even across all platforms in one view, with zero onboarding needed.

SKILLS

Tools

Notion, Figma, Miro, n8n, ChatGPT, Anthropic LLMs, GitHub, Low-Code Builders, Claude Code, MCP connections

AI & Technical

LLM-Assisted Workflows, Prompt Engineering, Agentic Systems, Conversational UX

EDUCATION

Bachelor of Technology in Mechanical Engineering

VIT Pune

08/2021 – 05/2025

Product Management & Agentic AI

IIT Patna Vishleshan iHub

05/2024 – 12/2024
